

How to print

Thank you for your order. Here's how to get the best prints at home or at a print shop.

1. Pick your file

- Letter: US, Canada, Mexico. A4: UK, Europe, Australia and most other countries.
- Open the PDF in Adobe Acrobat Reader (free) for the cleanest print. Browser previews can shrink pages.

2. Print at home

- Set Scale to "Actual size" or 100%. If your printer cuts off an edge, choose "Fit" instead.
- Paper: 24 lb / 90 gsm or heavier feels nicer to write on. Black-and-white printing works too; the pages are mostly line art and use little ink.
- Keep a copy where hard moments happen: by your bed, in your bag, or in a desk drawer. A clear sheet protector lets you trace the breathing pages again and again.

3. Double-sided printing

- Printer with two-sided printing: choose "Print on both sides" and "Flip on long edge".
- No two-sided option: print odd pages, put the stack back in (try 4 pages first to check which way it faces), then print even pages.
- The inner margin alternates left and right, so pages line up for a binder or spiral binding.

4. Print-shop tip

- Email or bring the PDF to a local print or office shop, or your library. Ask for: "Actual size, double-sided, 24 or 32 lb paper, coil binding on the left edge." A printed copy of the license below answers any copyright questions.

5. Personal-use license

- You may print as many copies as you need for yourself and your household.
- Please don't share, resell, or upload the files, or sell printed copies. For a group, class, or clients, message the shop first.

Trouble with a file? Message us through the shop and we'll help. Calm Nights supports, not replaces, professional care. In a crisis in the US, call or text 988.
