How it works

One butterfly a month, one wing cell a day. By the end of the month you have a picture of how the weeks really felt, which is often kinder than memory.

1

Choose your colors

Pick a pencil for each mood and color its circle in the key below. Use the same key all year, and add your own moods on the blank lines.

2

Color one cell each evening

Find today's number on the butterfly and color it in the mood that fits the day best. Mixed day? Split the cell, or use two colors.

3

Write a line if you like

The notes at the bottom of each month are for anything you noticed: sleep, people, busy weeks, good surprises.

4

Look back

At the end of the month, and again on the Year in color page, look for patterns. No judging, just noticing.
